Alhassan Alfarran

Software Engineer — Web & AI Systems

Moscow, Russia (residence permit) · +7 919 399 97 49 · kyan775909@gmail.com · Telegram: @hassan_9400
Portfolio: alhassan-portfolio-sigma.vercel.app · github.com/kyan9400 · linkedin.com/in/alhassan-alfarran-880b00246

Available for new roles · start date to be agreed · on-site, hybrid or remote · full-time or contract

PROFESSIONAL SUMMARY

Software Engineer specialising in Web & AI Systems, building production platforms since 2020. Currently developing document search and RAG systems in Python/FastAPI (OCR, hybrid semantic search with sentence-transformers + FAISS). Previously architected a greenfield operational platform end-to-end in React, TypeScript, Node.js, PostgreSQL and MongoDB, from API design and data modelling to deployment and production support. Focus on clean interfaces between UI, services and AI layers, and on features that work in real workflows — not demos.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, PHP, C++, C, Solidity

Backend: FastAPI, Node.js, Express, REST API design, async Python, authentication, role-based access, audit logging

Frontend: React, Next.js, Angular, Tailwind CSS, HTML5/CSS3, Vite, Figma

AI & Data: RAG pipelines, LLM integration, sentence-transformers, FAISS, hybrid search, OCR, PDF/Word/Excel parsing, Pandas, NumPy, data visualisation

Databases: PostgreSQL, MongoDB, Redis

Tools & Practices: Git, GitHub, JIRA, Agile/Scrum, code review, debugging & profiling, Cloudinary

PROFESSIONAL EXPERIENCE

Python / Full-Stack Developer — Elektroservis (Электросервис) Jan 2026 — Present
Moscow, Russia

- Building a document search and RAG system for engineering (PTO) documentation: indexing PDF, Word and Excel files, including scanned documents via OCR.
- Implemented hybrid search combining keyword matching with semantic retrieval (sentence-transformers + FAISS) to improve answer relevance.
- Developed FastAPI ingestion and query pipelines connecting parsing, indexing, retrieval and LLM-assisted answers.

Chief Full-Stack Developer — Avenue Group Jan 2025 — Dec 2025
Moscow, Russia · On-site

- Designed and shipped OKKP from scratch — a full-stack operational management platform with clear boundaries between UI, business logic and data layers.
- Architected the system end-to-end: React + TypeScript SPA, Node.js / Express REST API, PostgreSQL + MongoDB data layer.
- Built core modules — employee management, violation tracking, reporting dashboards — with role-based access control and audit logs.
- Built a secure media-upload pipeline (Cloudinary, Multer) and Excel-export reporting that lets non-technical staff produce audit-ready datasets.
- Owned deployment and production support; delivered a fully responsive Tailwind CSS UI.

Full-Stack Web Developer — Junzi Tech Solutions Oct 2024 — Jul 2025

Full-time

- Delivered full-stack features across client web applications using Node.js, Express, MongoDB and React in Agile teams.
- Optimised a critical API endpoint with a caching layer and query refactoring, cutting average response time by **~60%**.
- Designed RESTful APIs with consistent validation, error handling and response contracts; took part in code reviews and sprint planning.

Freelance Full-Stack Developer — Self-employed Jan 2020 — Present

Remote · client projects alongside full-time roles

- Built React/TypeScript web apps and dashboards and Python/FastAPI backends for international clients.
- Pathwise: FastAPI + PostgreSQL application with an async backend.
- Managed the full client lifecycle: scoping, estimation, delivery and post-launch support.

EDUCATION

Master's Degree — National University of Science and Technology MISIS, Moscow 2024 — 2026

Computer and Information Sciences

Bachelor's Degree — Ural Federal University, Yekaterinburg 2020 — 2024

Computer Science

CERTIFICATIONS (SELECTED)

- Full-Stack Web Development with Angular — Coursera, HKUST
- Server-side Development with Node.js, Express and MongoDB — Coursera
- Introduction to SQL; Understanding and Visualizing Data with Python — Coursera, University of Michigan
- Machine Learning for All — Coursera, University of London
- Programming with Google Go Specialization — Coursera
- JavaScript Algorithms and Data Structures; Data Visualization — freeCodeCamp
- ICDL — International Computer Driving Licence
